ANOTHER TWIST.

We challenged the Sentinel, some time ago.

to prove, by any "resolutions of the Vermont Legislature," that the Whigs of Vermont are not in favor of a Protective Tariff.

That innocent journal replied by referring us, and pretending to quote, the resolutions passed

by the Legislature in 1844. We printed the resolutions passed in 1811 and showed that the Sentinel was mistaken.

The Scalinel now changes ground, and it meant the resolutions of the Legislature of article are connect."

Let us see. The Sentinel in its article referring us to the resolutions of 1844, says:

"Since the passage of this resolution the Vermont Legislature has not made a formal declaration of opin-ion, and to this day this resolution stands the deliberate embodyment of whig tariff doctrine in this state." Very well. Now substitutte 1841 for 1844, and in a fair way of being all "corrected," see how "correct" the Sentinel shows itself;

The Vermont Legislature "made a formal declaration of opinion" in favor of the Tariff of '42 at its session of October 1842 as follows:

Resided by the Senate and House of Representarices. That the improvement in the business and the gradual advance in the prices of the products of the country, and especially in the great staple of Vermont, afford incontestible evidence of the beneficial effects of the present Tariff law." The "formal declaration of opinion" of the since the great Hale-storm.

THE ARMY.

The latest intelligence from the Army, which we find in the N. O. Pienyane, is that Gen. Taylor and Staff left Matamoras on the 4th inst. for his spadeful. Camargo, and all the remaining campaign troops were expected to leave by about the 10th.

"The Free Press says;
"Soda ash constitutes the flux which is used by American glass makers in the manufacture of glass. This article is obtained from abroad. The tariff of 42 imposes upon it a nominal duty of 5 per cent. ad valuem. McKay's free trade tariff doubles that duty."
"Again: will the Sentinel inform its readers whether the 100 per cent. additional duty imposed by isstree trade tariff, upon soda ash, which is obtained soicly from abroad, will benefit the American or Foreign manufacturer of glass."

And the way to do this, according to the Ga-

zette is to elect "a Congregational Minister, regularly ordained, and a member, in regular standing, of a Congregational Association."

We are glad to learn what, in the judgment of We are glad to learn what, in the judgment of the Gazette, are the qualifications necessary to constitute a "Godly man." The Rev. REMEMBER,

Freemen of Vermont, REMEMBER, that the only places on the face of the Globe from whence proceeded the tones of joy and gladness at the PROSPECT Of the passage of McKay's Tariff bill, were the BRITISH PARLIAMENT and the ISLAND of CUBA! In the one, Secretary Wulker's Free Trade Report was applauded and PRINTED, and in the other, they talk of erecting a "STATUE OF GOLD" to its author!

The Sentinel devotes some four columns of its 1811, and says further that, with this slight alteration "all the other dates and references in our struction. We receive with proper sensibility, its rebukes and its "corrections." We learn from it, among other things, that adding 5 to 5 is not by any means, as we had toolishly supposed, "100 per cent, additional."

And this is what that well-informed journal calls being "conrect"?

We have only to say that the resolutions of 1811 do not in the nemotrest degree sustain the Sentine! If we should prove it by long quotations from them, the Sentinel would only reply by sliding two or three years further brick, so we give it up?
